Virtually Perfect for Instant Digital Presence

VirtualPages™ is a reader that quickly and cost-effectively converts print into electronic editions. VirtualPages enables publishers to increase their return on their investment in online catalogs, ViewInside teasers, and Talking eBooks. With VirtualPages, publishers significantly reduce costs and turnaround time to create an almost instantaneous online presence.

Publishers enjoy increased return on their investment over complex content deliveries by using VirtualPages, which creates print look-alike and rich user-friendly online content at a fraction of the cost of complex XML workflow solutions.

VirtualPages provides ready-to-go functional components for you to pick and choose from and can be easily extended with multiple enhancements to provide additional functionality like audio highlights, activities and evaluations. The required components can be assembled in a modular, “building-block” approach to satisfy all functional requirements.

## About Impelsys

Impelsys is a leader in providing electronic content delivery solutions to the global publishing market. We help our clients compete, evolve and grow in an increasingly complex marketplace. Our revolutionary products and solutions help publishers market, distribute and deliver content online quickly and cost effectively. Through focused technology innovation and deep insights into the processes of the publishing, we help publishers create new online products and revenue streams without the overheads of traditional online publishing.

Impelsys' drive for perfection and passion for client's success has made us the preferred partner of leading publishers like McGraw-Hill, Elsevier, Wolters Kluwer, Benchmark Education, Marshall Cavendish and Houghton Mifflin among others. Headquartered in New York City, Impelsys operates across North America, Europe and India. For more information, please visit
